MX2456RM 6-in 1-out VGA-UXGA and Stereo Audio Switcher

Selection of the inputs can be made using the built-in front panel or through a control system/computer via RS-232. The MX2456RM is also capable of being operated in auto-switch mode, which allows the switcher to sense and switch to an active video input. Selection of audio signals can be made to either "follow" the video channel or to "break-away" from it. This is made easy using separate banks of buttons on the front panel or through RS-232 control. LIST
MX2456RM.....1295.00

CALL FOR PRICE

ALTINEX

DA1706SV 1-in 6-out Video/S-Video Distribution Amplifier

A 1-in 6-out distribution amplifier designed to allow the simultaneous connection of a single C-Video source and/or a single S-Video source to as many as six different display or recording devices. This configuration, with both BNC (C-Video) and 4-pin mini-Din (S-Video) connector types, provides a unique solution for applications requiring both signal types to be distributed at the same time. Note that the DA1706SV does not convert S-Video to C-Video or C-Video to S-Video. While the output is pre-compensated for up to 100 feet, the DA1706SV can actually drive a signal up to 250 feet or more when it is used with high quality 75-ohm coaxial cable. 1 RU, 1/2 rack wide. Includes external power supply. LIST
DA1706SV.....345.00

ALTINEX

DA1804NT

The DA1804NT is a high performance 1-in 4-out video distribution amplifier with 350 MHz bandwidth and very flat farequency response up to 200 MHz. It will pass NTSC, PAL or SECAM-type composite video signals as well as high-resolution monochrome computer video such as grayscale signals used in medical imaging. The DA1804NT can handle video signals with levels up to 1.5V p-p and using high quality 75 ohm coaxial cable, it can drive an NTSC signal 400 feet or more. Includes 9V 500mA power supply. LIST
DA1804NT 245.00

LEADER LT425D
Digital Component Test Signal Generator

A precision source of 10-bit 4:2:2 component digital test signals, the LT 425D offers features that make it an ideal choice for productions and development applications. These include both embedded AES/EBU digital audio test tones and a dedicated rear panel AES/EBU output. Front panel switching includes 625/50 or 525/60 operation (test signals adapt automatically to suit the system selected) on-off control of Y, Cb and Cr. Menu control of operating options is facilitated with front panel keys and on-screen menus. Rear panel facilities include 4 serial outputs (one digital black). 1 parallel output, 1 AES/EBU digital XLR audio output. 2 black burst analog outputs, a pair of genlock loop-through inputs and a 27-MHz clock output. LIST

Brick Video Accessories

Video Accessory Corporation ("VAC") manufactures a comprehensive line of precision video and audio distribution amplifiers, switches, signal generators, and accessories in many input, connector and power supply variations. VAC's BRICK video products, and COMBO BRICKS video&audio devices, utilize broadcast quality circuit designes in a proprietary encapsulation process that results in compact and robust devices that work reliably in the most extreme environmental conditions. The list below is only a very small sample of what is available. To help you choose the model that exactly meets your requirements, you may wish to use the Build-A-Brick product selection tool available at: **http://www.vac-brick.com/default.asp** Your Full Compass sales associate will be happy to assist you.
